SPN
INGENIERÍA Y PROYECTOS SL

QUALITY CONTROL

At SPN, we establish and verify the quality criteria applicable to materials, completed work items and inspection processes, ensuring traceability, compliance and proper documentation.

Scope of our services

Quality plan
Preparation and monitoring of the quality plan, defining criteria, controls, inspection frequencies and required documentation.

Traceability and records
Identification, recording and monitoring of materials, samples, inspections, tests and quality control results.

Inspections and testing
Performance and monitoring of inspections, on-site tests and laboratory testing in accordance with technical specifications.

Tolerances and acceptance criteria
Verification of dimensions, characteristics and results against established tolerances, specifications and requirements.

Material receipt and inspection
Technical and documentary verification of materials using certificates, data sheets, applicable markings, tests and acceptance criteria.

Nonconformities and corrective actions
Identification and recording of deviations, investigation of causes and verification of the corrective actions implemented.

Our approach

- **Compliance**
- **Traceability**
- **Reliability**

How we develop the project

1. Requirements review
2. Quality plan
3. Inspections and tests
4. Records and traceability
5. Records and traceability
6. Document closeout

Quality control with traceability and compliance
